PROFESSIONAL SUMMARY

Data and Business Analyst with 3+ years of experience across financial services, telecommunications and heavy-equipment distribution, turning complex datasets into KPIs, reports and decisions that stakeholders act on. Strong foundation in SQL (BigQuery), Python, R and BI tools, statistical analysis, A/B testing and process automation (up to 85% faster reporting). Industrial engineer with postgraduate training in Data Science and Artificial Intelligence, and a strong interest in banking, investments and fintech. Seeking a Business Analyst or Data Analyst role in Australia.

EDUCATION

Pontificia Universidad Católica de Chile, *Postgraduate Diploma in Artificial Intelligence* 2025
Pontificia Universidad Católica de Chile, *Postgraduate Diploma in Data Science* 2021
Universidad Adolfo Ibáñez, *Bachelor of Science in Engineering (Industrial Engineering)* 2014 – 2020

PROFESSIONAL EXPERIENCE

Claro Chile | Santiago, Chile | *Data Analyst, Business & Churn Analytics* 2025 – 2026

- Built an automated BigQuery pipeline (scheduled queries, Looker Studio reporting) that detects competitor calls and measures 5-day port-out risk across ~700k daily calls; behavioural signals identified segments with 4–6x higher churn probability, enabling retention outreach to ~600 customers per day.
- Segmented customers by churn risk to target retention strategies, and implemented A/B testing (control and treatment groups) to measure retention campaign performance.
- Evaluated marketing campaigns through statistical analysis, identifying conversion variations of up to ~35% among customer segments.
- Developed and automated churn, customer behaviour and competitor reports, reducing operational analysis and execution time by up to ~65%.
- Redesigned a low-quality sales KPI (67% precision, 9% recall) using a decision-tree classification model, proposing rules with 91.5% precision or 33% recall to improve commercial segmentation and prioritisation.

Salinas y Fabres (SALFA) | Santiago, Chile | *Business Analyst, Telematics Analytics* 2021 – 2022

- Produced strategic reports to monitor KPIs and support decision-making; led a corporate telematics data integration project, improving internal coordination and collaboration with customers.
- Analysed telemetry data to identify opportunities such as failure prediction and after-sales service optimisation.
- Managed stakeholder relationships, providing support and training and aligning technology with business objectives.

Principal Financial Group | Santiago, Chile | *Data Analytics Intern, Retirement Readiness* 2019 – 2020

- Analysed pension and retirement data to generate actionable financial insights supporting retirement planning in client portfolios.
- Automated and optimised reporting with VBA and SQL, reducing delivery times by 85.3%; collaborated with financial analysts and advisors to improve report quality.

TECHNICAL SKILLS

Data Science & ML: Python (pandas, scikit-learn), R (tidyverse), Machine Learning, Deep Learning, Web Scraping

Data Engineering & Cloud: SQL (BigQuery), Google Cloud Platform (GCP), data pipelines, Git

Data Analytics & BI: Power BI, Looker Studio, Tableau, Statistical Analysis, A/B Testing, KPI design

Business & Tools: Microsoft Office, Advanced Excel/VBA, Business Analysis, KPI Reporting, Process Automation, Stakeholder Management, AI Automation (LLM workflows)

Languages: Spanish (native), English (professional)
